My understanding is that we will present at their meetings when they request it. There were many West Hills reps at the workgroup meeting and we now have a West Hills rep coming to our technical stakeholders meetings, so we should re-think attending the West Hills meetings.

While filing this I noticed that you two weren't copied. She makes a couple of specific requests. Do you plan on attending/presenting at their next meeting?

Dear Ms. Barton,

First I want to say how much I appreciated your call and David's participation. We had discussed the TASC program.

I do understand the problems relative to public participation in our area. However, we have a whole community in West Hills that we represent. We have meetings every month within a committee - what is discussed in committee is brought forward to the full West Hills Neighborhood Council Board for action.

We really need toxicologists and health physicists to talk to us about health risk from this site.

I was sent the supporting documents for the Preliminary Site Assessment for this site by Nicole Moutoux. They really helped me. But I am left with so many questions - as are the rest of the community.

We could really use EPA's support of our community.

Thank you.

Chris Rowe
